|---|--|
| <input type="checkbox"/> Pre-project study / Etude avant-projet | <input type="checkbox"/> Started / Démarré   |
| <input type="checkbox"/> Stand-by / Mise en attente             | <input type="checkbox"/> Adjourned / Ajourné |
| <input checked="" type="checkbox"/> Completed / Finalisé        |  |

**RESULT / RESULTAT**

- Achieved / Atteint
- Partially met / Partiellement atteint : ... %
- Not Achieved / Pas atteint

**AREA / ZONE:** Worldwide

30 January 2018

## 1- OBSERVATION / CONTEXT

- Physical and psychological health are strongly affected by several factors: food, water, air quality, textiles, materials used for buildings, furniture & supplies, harmful electromagnetic waves, screens, etc.
- According to report 5V327\_IRRA001\_INTI, the assignment aims to implement architectural solutions for non-residential buildings (offices, factories, schools, administrative buildings, etc.) in order to bring a substantially positive impact on the physical and psychological health of the persons using it.

## 2- OBJECTIVES

- Identify as many health-affecting factors as possible in the building sector.
- Investigate in order to find safe or even biogenic alternatives to harmful methods.

## 3- ACTIONS

- Jul. 2017: the selected Raven units are starting their training (see report 5V327\_IRRA002\_REFO).
- As from Oct. 2017: deployment of Raven units in the targeted sectors.
  - Infiltration into architect and urban planning R&D structures.
  - The units have order to investigate marginalised paths (dowsing, geomancy, radionics, etc.) in order to identify work that could be used for new urban planning practices.

## 4- RESULTS

- Harmful health & environmental impacts of the material used in the building sector has been confirmed, as described and for example bellow:
  - Air pollution
  - Noise disturbance
  - Planned obsolescence
  - Complete isolation from the ambient environment
- Almost all architectures are highly biocidal due to their form, their harmful radionic impact, especially and particularly on the surrounding environment.
  - Building's geometric form has a very tangible impact on human health.
- This principle is now fully ignored, despite numerous scientific studies attesting it, such as:
  - Position and orientation of buildings.
  - Interior design of rooms and furniture based on needs.
  - Etc.
- The short or medium-term consequences of the above mentioned points on health include (non-exhaustive list provided for example purposes only):
  - Chronic fatigue
  - Respiratory disorders

30 January 2018

- Immune system deficiency
- Stress
- Depression
- Disturbance, in some major cases, of central nervous system itself.
- Alternative solutions:
  - According to our Raven units, some inefficient methods are artificially promoted to the public for marketing purposes only; whereas, solutions with very strong potential are neglected by the industry, since they do not produce enough profit.
  - Geopolymer materials: their properties do not have any of the negative effects mentioned earlier and their positive impact could be particularly significant.
  - Buildings position and interior design based on geomancy.
  - Radionics principles in architecture should be considered more seriously.
