AREA / ZONE: ASIA - Strategic scope

29 January 2021

1- OBSERVATION / CONTEXT

- Reminder following report B7890_IRRA006_UNRE:
 - The BNT162-bXXX vaccines previously produced have been classified as BIOLOGICAL HAZARD CLASS 6 by our Raven units.
 - Roll-out of BNT162-bXXX vaccines for distribution to global vaccination centres planned for December 2020.
 - Vaccines storage at 3 separate production sites in countries as far apart as possible. Storage is equipped with a "redundancy" system to compensate for any failure in one of the sites.

2- OBJECTIVES

- Substitute the vaccine containers, 6 days before the planned deployment at the 3 identified storage sites simultaneously.

3- ACTIONS

- In accordance with report B7890_IRRA005_PLST:
 - Feb 2020, Launch of Panther units' training.
 - Nov 2020, Activation of three first Panther units for the purpose described as follow.
 - Recover the YMG837-yXXX vaccines developed by our R&D teams within the selected laboratories (B7890_IRRA007_REDE)
 - Warehouse security systems disruption by a para-military faction (see reports B7890_IRRA008_PLST and B7890_IRRA009_ACCO)
 - Dec 2020, successful substitution of vaccines in the targeted warehouses by the 3 Panther Units.
 - Destruction of the BNT162-bXXX vaccine containers.

4- RESULTS

- Distribution of the YMG837-yXXX vaccines
- According to our intelligence services: substitution has been identified by the initial instigators following the first vaccinations. Despite the various aborted, cancelled, disrupted or blocked circumvention attempts, they continued their course according to the initial plan, relying on an alarmist "health crisis" marketing campaign (see report B7890_IRRA010_UNRE).
