RESULT / RESULTAT

- Achieved / Atteint
- Partially met / Partiellement atteint : 87 %
- Not Achieved/ Pas atteint

AREA / ZONE : Worldwide

7 May 2019

1- OBSERVATION / CONTEXT

- A Raven unit has been informed in 2013 by our intelligence services about the major health threat that electromagnetic waves represents for everyone.
- Priority scope (but not limited to): GSM communication, radar transmissions, satellites, radio, TV.
- After Wolf units' analysis, it was clear that an action in this field would be harmful to the sustainability of the solutions and to the overall strategy.
- Thanks to the work of numerous Raven, Fox and Wolf units over a period of several years, the context is now favourable and a concrete action is in our reach [153R8_IRRA000_RAGN].

2- OBJECTIVES

- Confirm the reported information and assign a level of harmfulness for each category of electromagnetic waves.

3- ACTIONS

March 2019

- Deployment of 160 Raven units, including field scientists, analysts, and technical specialists, to check and analyse a sample of generated frequencies [Command instruction report 07816_IRRA001_INTI].
- Raven units have infiltrated the most significant telecommunications facilities around the world to get information about currently used technologies [Command instruction report 07816_IRRA001_INTI].

4- RESULTS

April 2019

- Highly biocidal radio frequency emissions have been fully detected on the current GSM network.
- Altered and biocidal carrier frequency on 4G networks has been clearly exposed.
- Clear evidence has been obtained about extremely damaging and highly biocidal carrier frequency on all 5G networks.
- Altered carrier frequency on all wireless networks has been clearly identified.
- Unsafe hardware detected and identified.
- Finalisation of software investigation.

Confirmation of the "Level 5 harmfulness for living organisms" regarding the studied electromagnetic waves.

Main harmful impacts observed on human beings:

7 May 2019

- Inhibition of primary brain functions with a highly detrimental effect, especially on intelligence and emotional behaviour (e.g.: significant decrease in human empathy abilities).
- Severe potential damage on immune system (e.g.: intestines becoming porous).
- Radiation effects clearly identified as sensible endocrine disruptors.
- Major sleep disturbances and mood disorders that may lead to conflicts among people.
- Erectile dysfunction and clear decrease of human fertility that may lead to sterility.
